Gli stampi in **silicone 100% alimentare Silikomart Professional** sono ideali per la preparazione di ricette dolci e salate. Leggeri, resistenti e pratici sono la migliore alternativa a tutte le teglie e agli stampi preformati in altri materiali. Possono essere usati per la cottura nel forno elettrico, a gas o microonde, sulle griglie e sulle piastre perforate e per la congelazione nel freezer e negli abbattitori: resistono, infatti, a temperature da -60°C a +230°C, permettendo il passaggio diretto dal freezer al forno senza alcuna variazione delle caratteristiche tecniche del materiale. La conducibilità termica del silicone alimentare puro garantisce ottimi risultati nella cottura, mentre la naturale antiaderenza e flessibilità consentono una sformatura facile, veloce e perfetta, eliminando sprechi di tempo e di ingredienti.

Si lavano semplicemente sotto un getto d'acqua calda, con l'aiuto di una spugna, o in lavastoviglie. Possono essere riposti con il minimo ingombro: piegati o arrotolati, tornano sempre alla forma originaria. Il loro corretto utilizzo garantisce una durata superiore ai prodotti tradizionali.

LINEE SILIKOMART PROFESSIONAL:

La linea **SILICONFLEX** comprende una vastissima gamma di multiforme i cui criteri di modularità sono stati progettati per adattarsi perfettamente al formato gastronom e alla tradizionale teglia da pasticceria 60x40cm, affiancando rispettivamente tre o quattro stampi multiforme.

Nella linea **UNIFLEX** ogni tortiera dispone dello speciale anello di supporto removibile brevettato **SAFE RING** per mantenere l'impasto in forma perfetta dalla preparazione alla sformatura. Come lo stampo, l'anello resiste da -60°C a +230°C.

La linea **BABY FLEX** comprende stampi di piccole dimensioni e soggetti divertenti, adatti per creazioni spiritose e stravaganti.

Use instructions

The moulds made of 100% silicone suitable for alimentary use from Silikomart Professional, are ideal for the preparation of sweet and savoury recipes.

Light, resistant and practical are the best alternative to all baking trays and moulds made of other materials.

They can be used for baking them in the gas or electric oven, in the grill; on the wire rack shelf, in the microwave and to consolidate in the freezer or in the blast chiller: it resists temperatures from -60°C to +230°C, can be transferred directly from the freezer to the oven without any variation in material characteristics. The thermal conductibility of the silicone guarantees excellent results when baking, while the natural non-stick properties and flexibility allows quick, easy and perfect turning out, reducing loss of time and of ingredients.

They can easily be washed under hot running water, with a sponge, or in the dishwasher. They can be stored using minimal space; folded or rolled, as they always return to their original shape. The correct use guarantees a superior duration to other traditional products.

The SILICONFLEX line consists of an extensive range of multiforms, whose volume criteria has been designed to adapt perfectly to the gastronorm shape and the traditional 60x40 cm trays of confectioners, simply placing approximately three or four multiform moulds one by the other. In the UNIFLEX line, every mould is equipped with a special removable support ring; patented SAFE RING, to keep the mixture of the preparation in perfect shape until turning out. Like the mould, the ring resists temperatures from -60°C to +230°C. The BABY FLEX line consists of moulds of small dimensions and amusing shapes, which is ideal for funny creations. EASY CHOC, a new line of chocolate moulds made completely of 100% pure silicone for alimentary use, ideal to create perfect chocolates or refined chocolate mini-desserts. FORMAGEL is a new line of ice cream decoration moulds created to improve aesthetic appeal of the ice cream window display. Designed exclusively for professional use, the new range of silicone moulds "SESSANTAPERQUARANTA" was designed on the basis of a more efficient use of the cooking surface, thus reducing the preparation time by optimising productions in a single mould. TAPIS RELIEF The relief baking mats allows you to create relieved decorations in 1 or 2 colours, just in one freezing and baking operation. JELLYFLEX RANGE This collection includes special moulds for preparing fruit jellies, fondues and chocolate. SUGARFLEX Sugarflex is the line for working with chocolate, sugar and caramel.
